WHAT IS TELEHEALTH

Telehealth connects patients to vital health care services through videoconferencing and remote monitoring. By increasing access to physicians, telehealth helps ensure patients receive the right care, at the right place, at the right time.

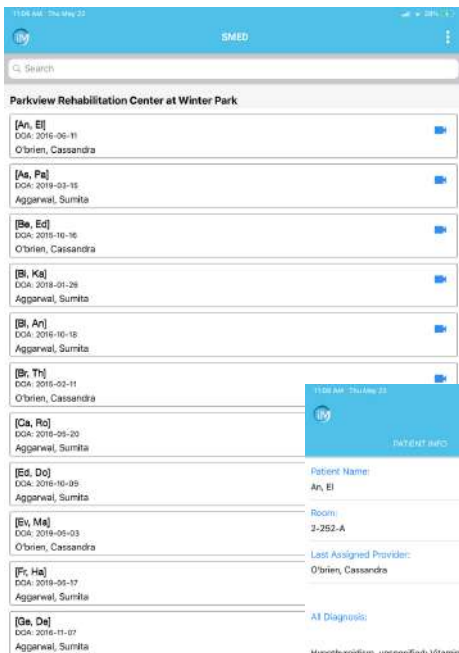

According to the American Hospital Association, 76% of U.S. hospitals connect with and utilize telehealth.

BENEFITS

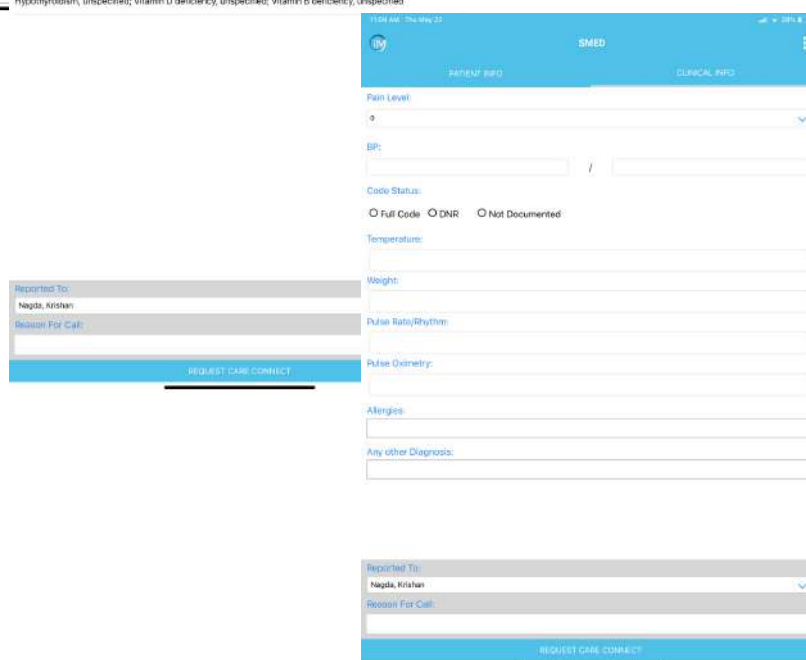

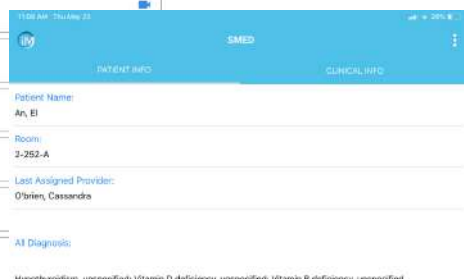

- Flexible options for monitoring patients and enhancing patient care
- Competitive advantage with proven outcomes to decrease avoidable rehospitalizations
- Increases access to care by a Physician or Nurse Practitioner
- Improves quality of care delivery
- Reduces healthcare costs
- Improves patient/family engagement and satisfaction
- Accessible anywhere

FEATURES

- Intuitive layout for easy navigation
- Cloud based application compatible with Android and iOS devices
- Fully HIPAA compliant video streaming
- Integration of digital stethoscope
- User friendly interface

Telehealth Requirements for Usage:

- Devices need to have a camera and microphone
- An internet connection (either Cellular or Wifi)
- A minimum of 1 megabit (up/down) per connection
