

Improving Psychiatry Care and Outcomes for Seniors When They Need It Most!

Powered by

TelePsychiatry, powered by **Dr. Owl**, is a HIPPA-compliant medical platform built on patented technology that offers residents, staff and community a safer alternative to a traditional in-person psychiatry visit.

Psychiatric care is now easier than ever to receive and available when you or your patients need it most. Medical history is available on demand and important information can be easily shared with family, caregivers, staff and providers resulting in better outcomes, reduced hospitalizations, increased efficiency and improved mental well-being, faster.

Our experienced psychiatrists provide mental health coverage in emergent and non-emergent cases for patients residing in inpatient and outpatient settings.

Benefits of TelePsychiatry

- Improved care for mental health patients
- Higher patient and provider satisfaction
- Increased quality for Psychiatry
- Faster response times to see patients during a mental health crisis

Helping You Navigate Life

- Anxiety/ panic disorders/ PTSD
- Bipolar disorder/ depression
- Mood disorders/ schizophrenia
- Psychiatric medical management/ optimization
- Substance Abuse
- Medication management
