TELEHEALTH— SLOWING THE SPREAD OF COVID-19

Our telehealth platform offers a HIPPA safe solution to slowing the spread of Coronavirus Disease (COVID-19) by providing two-way communication for patients, family members and providers.

Telehealth connects patients to vital health care services through videoconferencing and remote monitoring. By increasing access to physicians, telehealth helps ensure patients receive the right care, at the right place, at the right time.

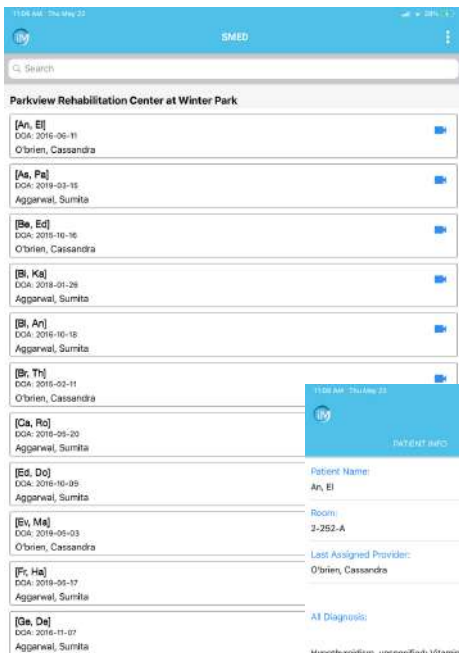

BENEFITS

- Reduces risk of COVID-19 exposure to patients and providers, while also ensuring quality of care is not compromised
- Flexible options for monitoring patients and enhancing patient care
- Competitive advantage with proven outcomes to decrease avoidable rehospitalizations
- Increases access to care by a Physician or Nurse Practitioner
- Improves quality of care delivery
- Reduces healthcare costs
- Improves patient/family engagement and satisfaction

FEATURES

- Intuitive layout for easy navigation
- Cloud based application compatible with Android and iOS devices
- Fully HIPAA compliant video streaming
- Integration of digital stethoscope
- User friendly interface

11:04 AM - Thu May 23
